Last week Dr. Faust, of Sait Luke city, was at the head of the frovo and Weber rivers, and located ten or twelve lakes that drain into these rivers. The people of Wasath county have located a number of them, and Dr. Faust the remainder. This gentleman has secured a benama for Sait Luke city, that being the object of the locations. These lakes are natural reservoirs, and with some little improvement will hold back water enough to supply several countles. Prove has missed an opportunity. If these are improved, a greater portion of the water will be taken down Prove river into Utah lake, thence by canal to supply Sait Luke city. Other parties were out also from Sait Luke city, to make similar locations, but they were just ages. He is the only Sait the country of t to make similar locations, but they were just two days too late.—Empirer,
